Interoffice Memo

November 4, 1980

TO: Cement Plant Managers
FROM: M. M. Reid
SUBJECT: Kiln Basic Brick Utilization

In order to minimize the impact of potential hazardous waste disposal problems, we have conducted tests to utilize used kiln brick in our process at several locations. These tests have proved that the kiln bricks can be recycled safely with no adverse effects on the process or product performance.

Would you please implement the same program at your plants as soon as practical. If you have any questions or comments, please contact me or George Messinger.
